Prescriere limitata: Se utilizeaza pentru pacientii care indeplinesc criteriile de eligibilitate stabilite prin Protocolul de prescriere a medicamentelor hipolipemiente.					
NOTA: Riscul de toxicitate musculară severă crește dacă fenofibratumul este utilizat simultan cu inhibitori de HMG CoA reductaza sau alți fibrați. Terapia combinata trebuie folosită cu precauție la pacienții cu dislipidemie mixta severă combinată cu risc cardiovascular înalt, în absenta antecedentelor de afecțiune musculară. Pacienții vor fi monitorizați regulat pentru semne cronice de toxicitate musculară					
Se aplica tuturor denumirilor comerciale, formelor farmaceutice si concentratiilor corespunzatoare DCI-ului.

Doza, durata tratamentului cu statine și nivelul colesterolului controlat inadecvat trebuie să fie înregistrate în dosarul medical al pacientului la momentul începerii tratamentului cu ezetimib. Valoarea colesterolului controlat inadecvat trebuie să fie mai recentă de două luni la momentul începerii tratamentului cu ezetimib.

Cod restrictie 2667: Tratamentul, în combinație cu dieta și exercițiu fizic, ce presupune asocierea cu un inhibitor de HMG CoA reductaza (statină) la pacienții al căror nivel de colesterol nu este controlat adecvat cu o statină și care au:(f) istoric familial de boala coronariană. Controlul inadecvat sub tratament cu o statina este definit astfel: (1) nivel al colesterolului peste pragul inițial după cel puțin 3 luni de tratament cu o statina în doza zilnică optimă de statine, concomitent cu dieta și exerciții fizice. Doza, durata tratamentului cu statine și nivelul colesterolului controlat inadecvat trebuie să fie înregistrate în dosarul medical al pacientului la momentul începerii tratamentului cu ezetimib. Valoarea colesterolului controlat inadecvat trebuie să fie mai recent de două luni la momentul începerii tratamentului cu ezetimib; SAU (2) Controlul inadecvat al colesterolului cu nivele ale acestuia mai mari decât 155mg/dl după cel puțin 3 luni de tratament cu o doza zilnică optimă de statine concomitent cu dieta și exerciții fizice. Doza, durata tratamentului cu statine și nivelul colesterolului controlat inadecvat trebuie să fie înregistrate în dosarul medical al pacientului la momentul începerii tratamentului cu ezetimib. Valoarea colesterolului controlat inadecvat trebuie să fie mai recentă de două luni la momentul începerii tratamentului cu ezetimib.

Cod restrictie 2668: Tratamentul, în combinație cu dieta și exercițiu fizic, ce presupune asocierea cu un inhibitor de HMG CoA reductaza (statină) la pacienții al căror nivel de colesterol nu este controlat adecvat cu o statină și care au:(g) HTA. Controlul inadecvat sub tratament cu o statina este definit astfel: (1) nivel al colesterolului peste pragul inițial după cel puțin 3 luni de tratament cu o statina în doza zilnică optimă de statine, concomitent cu dieta și exerciții fizice. Doza, durata tratamentului cu statine și nivelul colesterolului controlat inadecvat trebuie să fie înregistrate în dosarul medical al pacientului la momentul începerii tratamentului cu ezetimib. Valoarea colesterolului controlat inadecvat trebuie să fie mai recent de două luni la momentul începerii tratamentului cu ezetimib; SAU (2) Controlul inadecvat al colesterolului cu nivele ale acestuia mai mari decât 155mg/dl după cel puțin 3 luni de tratament cu o doza zilnică optimă de statine concomitent cu dieta și exerciții fizice. Doza, durata tratamentului cu statine și nivelul colesterolului controlat inadecvat trebuie să fie înregistrate în dosarul medical al pacientului la momentul începerii tratamentului cu ezetimib. Valoarea colesterolului controlat inadecvat trebuie să fie mai recentă de două luni la momentul începerii tratamentului cu ezetimib.

Cod restrictie 1989: Pacienți care îndeplinesc criteriile de eligibilitate pentru prescrierea de hipolipemiente (în concordanță cu criteriile stabilite în Protocoalele de prescriere în vederea decontării) atunci când tratamentul cu un inhibitor de HMG CoA reductaza (statine) este contraindicat

Cod restrictie 2669: Pacienți care îndeplinesc criteriile de eligibilitate pentru prescrierea de hipolipemiente (în concordanță cu criteriile stabilite în Protocoalele de prescriere în vederea decontării) atunci când tratamentul cu un inhibitor de HMG CoA reductaza (statin) trebuie întrerupt sau redus la mai puțin de 20 mg/zi datorită apariției efectelor secundare următoare: (i) Mialgie severă (simptome musculare fără creșterea CK) care survine pe perioada tratamentului cu statine; sau (ii) Miozita (creșterea importantă a CK, cu sau fără simptomatologie musculară) demonstrată prin valori de două ori mai mari decât limita superioară a normalului la o singură determinare sau o tendință de creștere la determinări consecutive, neexplicate de alte cauze; sau (iii) Persistența unor valori crescute ale transaminazelor, neexplicate de alte cauze (mai mult de trei ori decât valoarea limită maximă a normalului) în timpul tratamentului cu o statina

Cod restrictie 1991: Homozygous sitosterolaemia;

Cod restrictie 2438: Pacienți cu hipercolesterolemie familială (homozigotă) care sunt eligibili pentru tratamentul cu hipolipemiente (în concordanță cu Protocolul de prescriere în vederea decontării), în combinație cu un inhibitor de HMG CoA reductază (statin).

Se aplică tuturor denumirilor comerciale, formelor farmaceutice și concentrațiilor corespunzătoare DCI-ului.

Terapia asociata a cancerului ovarian epitelial avansat cu carboplatinum la pacientele cu recadere la mai mult de 6 luni dupa chimioterpia cu derivati de platinum.					
Tratamentul de prima intentie al cancerului pulmonar cu alt tip de celule decat cu celule mici, stadiile IIIA sau IIIB sau IV in asociere cu cisplatin.					
Tratamentul paliativ al cancerului pulmonar cu alt tip de celule decat cu celule mici avansat local sau metastatic.					
Adenocarcinom pancreatic avansat local sau metastatic.					
Tratamentul asociat al cancerului vezical avansat local sau metastatic in combinatie cu cisplatin.					
Se aplica tuturor denumirilor comerciale, formelor farmaceutice si concentratiilor corespunzatoare DCI-ului.

Prescriere limitata:		Tratamentul adjuvant in asociere cu doxorubicina si ciclofosfamidă, adjuvant al pacientelor cu cancer mamar operabil, cu ganglioni pozitivi.			
		Tratamentul in asociere cu doxorubicina, al pacientelor cancer mamar avansat loco-regional sau metastazat, care nu au primit anterior tratament citotoxic pentru aceasta afectiune.			
		Tratamentul in monoterapie al pacientelor cu cancer mamar avansat loco-regional sau metastazat, după eșecul tratamentului citotoxic. Chimioterapia anterioară trebuie să fi inclus o antraciclina sau un agent alchilant.			
		Tratamentul in asociere cu trastuzumab, al pacientelor cu cancer mamar metastazat ale căror tumori exprimă în exces HER2 și care nu au primit anterior chimioterapie pentru boala metastatică.			
		Tratamentul in asociere cu capecitabina, al pacientelor cu cancer mamar avansat loco-regional sau metastazat, după eșecul chimioterapiei citotoxice. Tratamentul anterior trebuie să fi inclus o antraciclina.			
		Tratamentul pacienților cu cancer bronhopulmonar, altul decât cel cu celule mici, avansat loco-regional sau metastazat, după eșecul chimioterapiei sau înainte de aceasta.			
		Tratamentul in asociere cu cisplatina, al pacienților cu cancer bronhopulmonar, altul decât cel cu celule mici, nerezecabil, avansat loco-regional sau metastazat, la pacienții care nu au primit anterior chimioterapie pentru această afectiune.			
		Tratamentul in asociere cu prednison sau prednisolon, al pacienților cu cancer de prostata metastazat, hormono-rezistent.			
		Tratamentul in asociere cu cisplatina si 5-fluorouracil, al pacienților cu adenocarcinom gastric metastazat, inclusiv adenocarcinom al joncțiunii gastroesofagiene, care nu au primit anterior chimioterapie pentru boala metastatică.			
		Tratamentul in asociere cu cisplatina si 5-fluorouracil de inducție la pacienți cu carcinom cu celule scuamoase, al capului și gâtului, avansat local.			
		Se aplica tuturor denumirilor comerciale, formelor farmaceutice si concentratiilor corespunzatoare DCI-ului.

NOTA: Tratamentul pacienților cu neoplasm de sân metastatic cu HER2 amplificat:						
a) ca monoterapie în cazul pacienților tratați cu cel puțin două regimuri chimioterapice pentru boala lor metastatică. Chimioterapia anterioară trebuie să fi inclus cel puțin o antraciclină și un taxan, cu excepția cazurilor în care aceste chimioterapice nu erau indicate. Pacienții pozitivi la receptorii hormonalii trebuie de asemenea să fi prezentat un eșec la tratamentul hormonal, cu excepția cazurilor în care acest tip de tratament nu a fost indicat						
b) în asociere cu Paclitaxel pentru tratamentul pacienților care nu au primit chimioterapie pentru boala lor metastatică și pentru care nu este indicat tratamentul cu antraciline.						
Herceptin trebuie folosit numai la pacienții ale căror tumori prezintă HER2 amplificat la nivel 3+ , determinat prin imunohistochimie.						
Trastuzumab nu trebuie utilizat la pacienti cu o fractie de ejectie ventriculara a ventriculului stang mai mica de 45% si/sau cu insuficienta cardiaca simptomatice. Functia cardiaca trebuie testata.

Prescriere limitata:

Infertilitate anovulatorie.

Pentru tratamentul infertilitatii masculine ca urmare a hipogonadismului hipogonadotrop;

Pentru tratamentul infertilitatii masculine asociata cu deficit de LH;

Pentru tratamentul barbatilor care au insuficienta combinata de GH si gonadotropine si la care absenta caracterelor sexuale secundare indica o intarziere de maturare.

Pentru tratamentul baietilor de peste 16 ani care au manifestari clinice ale hipogonadismului sau ale pubertatii intarziate. Tratamentul nu trebuie sa depaseasca 6 luni.

NOTA:

Cu exceptia cazurilor de hipopituitarism sau amenoree primara, pacienta trebuie sa fi fost tratata anterior cu citrat de clomifen si/sau gonadorelin, iar tratamentul sa fi ramas fara efect (sarcina nu a fost obtinuta). Femeile care au urmat tratament pentru inducerea ovulatiei cu alte clase de medicamente si nu au obtinut o sarcina necesita evaluare laparoscopică pentru a exclude alte cauze care impiedica aparitia unei sarcini. Oligomenoreea trebuie sa fie prezenta de cel puțin douăsprezece luni sau amenoreea sa fie prezenta de cel puțin sase luni inaintea tratamentului. Înaintea acestui tratament pacientele cu hiperprolactinemie trebuie sa fi urmat tratament specific medical sau chirurgical.

Se aplica tuturor denumirilor comerciale, formelor farmaceutice si concentratiilor corespunzatoare DCI-ului.
